

Fleet Lifecycle Management

Streamline, secure,
and save on
mobility

Managing a growing mobile fleet is complex and time-consuming. Lost devices, inefficient processes, and compliance risks can drain resources and expose your organisation. Ericom's Fleet Lifecycle Management streamlines every stage—from procurement to retirement—boosting visibility, security, and operational efficiency.

Why Fleet Lifecycle Management

- ✓ **Full asset visibility:** Track every device and SIM in real-time, reducing losses and ensuring compliance across your entire mobile fleet.
- ✓ **Operational efficiency:** Streamline procurement, repairs, and returns to minimise admin overhead and keep your workforce moving.
- ✓ **Secure offboarding:** Certified wipes and device destruction protect sensitive data during employee transitions or device retirement.

How it works

- 01 Deploy:** Devices and SIMs are sourced, tagged, and delivered with full asset tracking for visibility from day one.
- 02 Optimise:** Usage and plan data are monitored in real-time, enabling proactive management and cost optimisation.
- 03 Retire:** Devices are securely wiped, recycled, or destroyed, ensuring compliance and data protection at end-of-life.

Getting started with Ericom

- 1 Assess your current fleet and requirements with an Ericom specialist.
- 2 Deploy devices using streamlined procurement, tagging, and delivery processes.
- 3 Access ongoing support, reporting, and secure device retirement services.

Key service deliverables

Asset tracking tools Real-time tracking of devices and SIMs reduces losses and ensures compliance, with full visibility across your mobile environment.

Automated procurement Streamlined ordering, tagging, and delivery processes minimise delays and administrative effort for new device rollouts.

Warranty and repair management Centralised coordination of repairs, warranty claims, and device hot swaps minimises downtime and keeps your workforce productive.

Certified device retirement Secure device wipes and destruction, with certificates provided, protect sensitive data and support compliance requirements.

Device Buy-Back Program Unlock additional value by trading in eligible devices at end-of-life. Ericom assesses residual value and coordinates secure buy-back, helping you recover costs and support sustainable asset management.

ASSETSECURITY

Gain confidence that every device is tracked, managed, and securely retired—reducing risk of loss, theft, or data breach. Real-time asset tracking and certified device wipes ensure compliance and protect sensitive information throughout the device lifecycle.

ABOUTUS

Ericom is a leading provider of smart solutions for organisations managing complex mobile environments. We combine technology and expertise to help you address operational challenges and deliver better business outcomes.

ADMINEFFICIENCY

Reduce manual effort and errors with automated processes for procurement, deployment, and device lifecycle management. Streamlined workflows and centralised reporting free your team for strategic priorities and improve accuracy across your mobile environment.
